

31st Dec-2009.

Wishing you a happy 2010 and let the year be guided through your inner inspiration.

I am at Asia Plateau with a small group thinking about ourselves, the future of our work and what we want to create out of our ourselves and the team which will be able to give direction to many aspects of our life and to the society. Long hours of silence and finding the real 'I' which can merge with 'WE' has been the focus and search of this gathering.

Receiving your own hand written letter will bring back the memories of the youth conference, and I am sure the time spent at youth conference will reflect in front of you. After reading your letter sit quietly switching off all your distractions and genuinely have long quiet time reflecting on the letter and your

personal journey after youth conference till the very end of the year 2009.

Wish you good luck and would love to meet you whenever 'HE' connects us.

Aleha joins me in sending ~~her~~ greetings to you and the family.

Regards.
